Student Learning Summary

OH Stowe works to provide a learning environment that is focused on the growth and development of the whole child. In addition to academic resources, Stowe has seen the need to provide a full-time second assistant principal and counselor to the campus. The counselor serves as a Crisis Intervention Counselor. Additionally, this year, the campus is providing a MTSS Specialist to assist in the structure, design, and implementation of intervention across the campus.

School Processes & Programs

School Processes & Programs Summary

Students at Stowe are served by a number of specialized programs related to student need. 83% of students are served by the free/reduced price lunch program, (BISD 58%) and 33% of students are English Learners (ELs), (BISD 20%) served by bilingual or English as a second language (EB) programs. Currently, 17% of students are served through special education, (BISD 10%).

Another specialized program at O.H. Stowe, is our special education SEEC (Structured Education Environment Classroom) program. The SEEC program supports students with communication disabilities. There are two self-contained SEEC classrooms. The ultimate goal is to maximize student placement in mainstream settings where they have access to the general curriculum and interactions with peers.

The academic RtI/MTSS program serves students in grades K through 5 in both reading and mathematics. Students are identified for tiered intervention services using data from universal screeners administered three times each year and through consideration of other performance evidence by a collaborative conference committee. The specific services provided for students on Tiers 2 and 3 are outlined in the district MTSS Manual, which is updated annually to reflect programmatic changes in screening assessments and interventions. The campus houses three certified reading interventionists, three educational assistants, and one MTSS Specialist who works with teachers in order to develop quality intervention in the classroom setting.

Performance data suggest that the RtI program has been moderately successful in moving students off of tiered interventions, there remains too large of a proportion of students served on Tier 3, which is based in part on universal screener performance below the 10th percentile nationally.
